

AMIT'S WEEKLY WORKOUT PLAN

12-Week Weight Loss & Strength Program - Home Equipment Edition

Profile: Male, 52 yrs - 5'7" (170 cm) - 185 lb - Waist 35 in

Goal (12 weeks): 165 lb - Waist <= 32 in - Increased strength & stamina

Baseline: 4:30 AM jog, 3-4 mi, 4x/week (~60 mi/month) - the only current workout

Equipment: Home only - dumbbells, resistance bands. Added time: 20-30 min, 3x/week.

WHY THIS PLAN IS BUILT THIS WAY

Your jogging base is solid - the plan keeps it unchanged and layers on 3 short home strength sessions, tighter hydration/sleep, and calorie/protein guardrails. Losing 20 lb in 12 weeks averages ~1.6-1.7 lb/week - achievable with consistent execution, but get medical clearance first given age and pace of this goal. Not personalized medical or dietetic advice.

WEEKLY OVERVIEW

Day	Morning Jog (unchanged)	Added Strength / Recovery	Total Time
Monday	3-4 mi jog (4:30 AM)	Circuit A - Lower Body & Core (20-25 min)	~55-65 min
Tuesday	Rest from jogging	Mobility & Stretch (15 min)	~15 min
Wednesday	3-4 mi jog (4:30 AM)	Circuit B - Upper Body & Core (20-25 min)	~55-65 min
Thursday	Rest from jogging	Optional easy walk (20-30 min) or rest	Optional
Friday	3-4 mi jog (4:30 AM)	Circuit C - Full Body & Core (20-25 min)	~55-65 min
Saturday	Long jog, ~4 mi	None - pure cardio day	~40 min
Sunday	REST DAY	Full recovery	-

MONDAY - CIRCUIT A: LOWER BODY & CORE

Post-jog, 20-25 min

Exercise	Sets	Reps	Notes
Goblet Squat (dumbbell)	3	12	Chest tall, knees track over toes
Dumbbell Romanian Deadlift	3	12	Hinge at hips, soft knees
Dumbbell Walking Lunge	3	10/leg	Long stride, controlled descent
Glute Bridge (bodyweight/DB)	3	15	Drive through heels, squeeze at top
Plank	3	30-45 sec	Hips level, brace core
Standing Calf Raise (DBs)	3	15	2 sec up, 2 sec down

Finish: quad stretch - hamstring stretch - calf stretch on wall (3-5 min)

WEDNESDAY - CIRCUIT B: UPPER BODY & CORE

Post-jog, 20-25 min

Exercise	Sets	Reps	Notes
Dumbbell Floor Press	3	12	Control descent, elbows ~45 deg
Dumbbell Bent-Over Row	3	12	Flat back, squeeze shoulder blade
Dumbbell Shoulder Press	3	12	Don't arch lower back
Band Pull-Apart	3	15	Slow, squeeze shoulder blades
Dumbbell Bicep Curl	3	12	Full range, no swinging
Dead Bug	3	12/side	Slow, lower back flat on floor

Finish: chest doorway stretch - shoulder cross-body - triceps overhead (3-5 min)

STRENGTH FORMAT (ALL 3 CIRCUITS)

- 3 sets per exercise - 12-15 reps (or time noted) - 60-75 sec rest between sets
- Stop 2-3 reps before failure - form over weight, always
- Increase dumbbell weight 2.5-5 lb only after 2 clean sessions in a row

FRIDAY - CIRCUIT C: FULL BODY & CORE

Post-jog, 20-25 min

Exercise	Sets	Reps	Notes
Dumbbell Thruster (squat-press)	3	12	Lighter DBs, full range
Renegade Row (DBs, plank)	3	10/side	Minimize hip rotation
Reverse Lunge to Curl	3	10/leg	Combines legs + arms
Bird Dog	3	12/side	Pause at top, opposite arm/leg
Side Plank	3	20-30 sec/side	Stack hips, straight line
Mountain Climbers	3	30 sec	Moderate pace, brace core

Finish: full-body static stretch, hold each 20-30 sec

TUESDAY & THURSDAY - MOBILITY & RECOVERY (15 MIN)

Not a rest-from-movement day

- Dynamic hip circles + leg swings - 10 each direction/side
- World's Greatest Stretch - 5/side - Hip flexor kneeling stretch - 30 sec/side
- Foam roll or hand-massage calves, hamstrings, IT band - 3-4 min
- Optional: 20-30 min easy walk on Thursday if you want extra movement without load

SATURDAY (LONG JOG) & SUNDAY (FULL REST)

- Saturday: pure cardio, no added strength. Full stretch cool-down after (quads, hams, calves, hip flexors, lower back).
- Sunday: no training. Sleep in if you can, hydrate, meal-prep for the week, light walk only if restless.

HYDRATION PLAN (Target: ~3.0-3.3 L / 100-110 oz per day)

Time	Action
On waking (before 4:30 AM jog)	300-400 ml water immediately
Right after jog	200-300 ml water (more if hot/humid)
Breakfast	1 full glass with the meal
Mid-morning	Refill & finish a 500 ml bottle
Lunch	1 full glass with the meal
Afternoon	Refill & finish a second 500 ml bottle
Dinner	1 full glass with the meal
After ~7:30 PM	Taper fluids - sip only, protect sleep

Rule of thumb: if nothing but coffee before lunch, you're already behind for the day.

SLEEP PLAN (Target: Lights-out by 9:00-9:15 PM)

Waking at 4:30 AM makes a full 8-hour night hard. A consistent 9:00-9:15 PM lights-out gets you ~7-7.25 hours - a real upgrade over an irregular schedule.

Time	Wind-down step
8:15 PM	Stop screens/work email - dim the lights
8:15-8:35 PM	Light stretch/short walk - lay out jog clothes & fill bottle
8:35-8:50 PM	Shower/hygiene - brief non-stimulating reading
8:50-9:00 PM	Lights out

- Caffeine cutoff: none after 2:00 PM
- Consistency: same lights-out time on weekends too (+/- 30 min max)

EATING GUARDRAILS (Not a full meal plan - just the rules that matter)

- Daily calorie target: ~1,900-2,050 kcal (est. maintenance ~2,550-2,650 kcal/day)
- Protein target: ~130-150 g/day (~30-40 g per meal) to protect muscle in a deficit
- Half the plate = vegetables/fruit at lunch and dinner
- Cut liquid calories - water, black coffee, unsweetened tea only
- Keep starchy carbs concentrated around the morning jog
- Dinner cutoff by 7:30-8:00 PM - aligns with sleep wind-down
- Batch-prep meals once a week (e.g. Sunday) to avoid impulsive choices
- One flexible meal per week is fine - supports long-term adherence

12-WEEK PHASED PROGRESSION

Phase	Weeks	Strength Focus	Jog Adjustment	Target Cumulative Change
Phase 1 - Foundation	Wks 1-4	Learn form, light-mod DB loads	Keep pace/distance as-is	-4 to -6 lb - waist -0.5 to -1 in
Phase 2 - Build	Wks 5-8	Increase DB weight 2.5-5 lb	Swap 1 Sat long jog/2wks for tempo	-10 to -13 lb - waist -1.5 to -2 in
Phase 3 - Sharpen	Wks 9-12	Highest resistance within limits	Maintain volume, focus on pace	-18 to -20 lb - waist <=32 in

KEY REMINDERS

- Get a quick medical check-up/clearance before ramping up training load at 52.
- Warm-up and cool-down are not optional - joint health matters more now.
- Progressive overload only when form is solid for 2 consecutive sessions.
- Track mileage/pace on your Nike dashboard monthly - confirm ~60 mi/month holds.
- A missed strength session is not a failure - get back on schedule next time.
- Sleep and hydration are load-bearing parts of this plan, not afterthoughts.
